

Benjamin “Benji” Adjepong

(757)-319-9675 | benji@vt.edu | [linkedin.com/in/benjaminadjepong](https://www.linkedin.com/in/benjaminadjepong)

OBJECTIVE

Seeking experiential learning opportunities such as internships/co-ops to apply technical skills in a collaborative environment

EDUCATION

VIRGINIA TECH | BLACKSBURG, VA

Master of Engineering – Computer Engineering

Focus Area: Machine Learning

EXPECTED SPRING 2026

GPA: N/A

VIRGINIA TECH | BLACKSBURG, VA

Bachelor of Science – Computer Engineering

Focus Area: Machine Learning

EXPECTED SPRING 2025

GPA: 3.58

EXPERIENCE

MICROSOFT | REDMOND, WA

MAY 2024 – AUGUST 2024

Software for Hardware Engineer Intern – Log Based Anomaly Detection

- Established an AI/ML framework for operation health assessment of devices utilizing log files
- Conducted data cleaning and parsing to transform raw log data into a structured format, enabling thorough log data analysis
- Trained and deployed an unsupervised model to identify anomalous data points in device log dataset

COLLINS AEROSPACE | STERLING, VA

JUNE 2023 – AUGUST 2023

SEPP Mission Systems Software Engineer Intern – Station Keeping Playbook (SKP)

- Developed operational testing platform for unmanned aerial systems (UAS) on ground robots reducing costs by up to 90%
- Tested autonomous capabilities for UAS's by integrating autonomous flight software onto ground robots using Py-C bindings
- Learned and implemented various python libraries to process GPS & IMU data to command motors based on SKP outputs
- Presented project results to company leadership at HQ through PowerPoint presentations and a booth setup at the SEPP fair

VIRGINIA TECH NATIONAL SECURITY INSTITUTE | BLACKSBURG, VA

SEPTEMBER 2023 – MAY 2024

Project Manager – Edge Supercomputing for Autonomous Sensor Platforms

- Led and oversaw the operations of a team composed of four undergraduate researchers to achieve project goals
- Learned the foundational knowledge and practical skills in program management specifically for government projects
- Developed detailed project budgets and schedules, while also identifying and reporting on potential performance risks

HUME CENTER FOR NATIONAL SECURITY & TECHNOLOGY | BLACKSBURG, VA

DECEMBER 2022 – MAY 2023

Paid Undergraduate Research Assistant – Boeing IoT Device Characterization

- Conducted extensive experiments testing range, battery and durability of Bluetooth Low Energy (BLE) IoT devices
 - Analyzed sensor data using Putty and Python scripting to identify behavioral trends
 - Presented detailed reports on the findings of the experiments to IoT development team at Boeing
-

PROJECTS

TECH-BASED DISEASE DETECTION IN DAIRY CATTLE | SENIOR DESIGN PROJECT

AUGUST 2024 – PRESENT

Project Manager/ Team Lead

- Led cross-functional team in development of real-time, machine learning based biosensor system for SCM detection in cattle
 - Facilitated regular team meetings with customers and created agendas & budgets to ensure alignment with technical goals
 - Conducted literature surveys and review research papers to familiarize team with industry standards and best practices
 - Designed and implemented machine learning submodule for data fusion and anomaly detection to meet 90% accuracy
-

SKILLS

LANGUAGES

- Embedded C, C, C++, Python, R, Verilog/VHDL

SOFT SKILLS

- Effective Communication, Adaptability, Time Management

TECHNICAL TOOLS

- Arduino, Nvidia Jetson Nano, ROSMASTER X3, TI MSP432 Launchpad & Boosterpack, AD2 Oscilloscope, DE10-Lite FPGA
-

EXTRACURRICULAR ACTIVITIES

NATIONAL SOCIETY OF BLACK ENGINEERS | VT CHAPTER SENATOR

SEPTEMBER 2021 – PRESENT

- Organized and coordinated 5+ social and academic events for the general student body at Virginia Tech
 - Participated in 10+ professional development events such conferences and resume review workshops
-

- **INTERESTS:** Machine Learning, Embedded Software Systems, Robotics
- **HOBBIES:** E-skating, Hiking, Kayaking, Fitness, Ping-Pong, Basketball, Soccer
